## Experience

### Product Designer

#### Tempus

Jan 2021 - Present

Chicago, Illinois,

- Improved the internal process of structuring and sharing data between systems & teams through a new web app, resulting in ~80% increase in efficiency of the process.
- Leading the research & design of a platform for scientific research through close collaboration with PM, engineering and users.
- Working with the design systems team to regularly add to and improve the overall maturity of the design system.

### UX Designer

#### Emmersion.ai

June 2020 - Dec 2020

Lehi, Utah

- Led the design of new features for Emmersion's enterprise platform.
- Represented design in strategy meetings, and surfaced research learnings to the larger team and stakeholders to help in planning.

### Product Designer

#### IMI, UT Austin

Aug 2019 - May 2020

Austin, Texas

- Identified pain points and product direction for a mental health application through quantitative and qualitative research with psychologists and young adults
- Designed a peer-support based mobile platform that removes barriers in access to mental health care through matching, community features, and on-demand care.

### Design Intern

#### Nokia

Jan 2020 - May 2020

Austin, Texas

- Designed and delivered two new B2B concept product demos in the space of (1) 5G-Mobile Edge Computing service orchestration and (2) Monetization platform for consumption based charging of telecom services.

### Design Intern

#### Roomster

June 2019 - Aug 2019

New York city, NY

- Led discovery and research within cross-functional teams to validate product features for its 1,000,000+ users.
- Led the re-design of iOS mobile app and web platform.
